Professional Summary

Frontend Developer specializing in React and Next.js, focused on building responsive, high-performance UIs for modern web applications. Comfortable working across the stack with Node.js, Express, and MongoDB to integrate secure APIs and end-to-end features

Technical Skills

Core Frontend: HTML5, CSS3, JavaScript (ES6+), React, Next.js, Context API

Styling & UI: Tailwind CSS, Sass (SCSS), Responsive design

Tools & Platforms: Git, GitHub, Vite, Webpack, NPM, Figma (Design-to-Code), VS Code

Backend: Node.js, Express.js, RESTful APIs

Experience

Gennext IT Management Consultancy Pvt Ltd

March 2025 – Dec 2025

Frontend Developer (Internship)

Noida

- Engineered dynamic, scalable frontend workflows using React.js and Next.js, with reusable UI components and client-side routing to standardize the ERP interface and accelerate feature delivery.
- Developed custom ERP modules and forms using the Frappe Framework, integrating RESTful APIs and basic backend logic (data validation, CRUD operations) to keep enterprise data in sync in real time.
- Collaborated closely with design and engineering teams by creating and reviewing high-fidelity Figma prototypes, handling UI bug fixes, minor backend tweaks, and polish work to ensure smooth end-to-end user experiences.

MangosOrange

Nov 2024 – March 2025

Internship

Noida

- Built responsive web interfaces from scratch, translating design concepts into functional code using HTML, CSS, and React.js.
- Adopted real-world development practices, including version control and collaborative coding standards, simulating a professional agile environment.

Projects

DealForge – Interactive AI Negotiation Game | *React, Node.js, Express, MongoDB, Mistral AI API, Tailwind CSS*

- Implemented secure **JWT authentication** and robust **MongoDB schemas** to protect user data and reliably persist negotiation scores.
- Integrated **Mistral AI** to power realistic, context-aware multi-round seller negotiations, significantly enhancing user engagement and immersion.
- Built a real-time **React chat interface** with state-managed game flow and optimized frontend updates to reduce perceived latency and support concurrent sessions.
- Engineered modular **Express middleware** (rate limiting, CORS, error handling) and a global leaderboard with persistent scoring and ranking logic to safeguard AI endpoints and drive user retention.

Live Demo:<https://dealforgein.vercel.app>

Stello E-commerce Web App | *Next.js, Context API, Supabase, Tailwind CSS, Cloudinary, Vercel*

- Architected a high-performance e-commerce platform with **Next.js** and **Tailwind CSS** for an SEO-friendly and responsive user experience.
- Managed global state with **Context API** to handle cart logic, user sessions, and shared application data.
- Implemented category-based filtering and dynamic routing using **Supabase (PostgreSQL)** to support scalable product navigation.
- Integrated secure authentication through **Supabase Auth** to protect user accounts and personalize sessions, with optimized media delivery via Cloudinary.
- Live Demo:** stello-rho.vercel.app

Education

Dr. A. P. J. Abdul Kalam Technical University

2021 – 2025

B.Tech in Computer Science

CGPA: 7.01

Certifications

Programming with JavaScript – Coursera
