Professional Summary

Frontend-leaning full-stack developer specializing in React and Next.js, with hands-on experience building AI-integrated features (LLM prompt engineering, Mistral AI) and RESTful APIs across Node.js/Express and MongoDB. Comfortable working across the stack to ship secure, production-ready web applications end to end.

Technical Skills

- **Core Frontend:** HTML5, CSS3, JavaScript (ES6+), React, Next.js, Context API
- **Styling & UI:** Tailwind CSS, Sass (SCSS), Responsive design
- **Backend & Database:** Node.js, Express.js, RESTful APIs, MongoDB, JWT Authentication
- **AI / LLM:** Prompt Engineering, LLM API Integration (Mistral AI), Context-Aware Conversational Systems
- **Tools & Platforms:** Git, GitHub, Vite, Webpack, NPM, Figma (Design-to-Code), VS Code

Experience

Frontend Developer (Internship) — Gennext IT Management Consultancy Pvt Ltd

March 2025 – Oct 2025

Noida

- Engineered dynamic, scalable frontend workflows using React.js and Next.js, with reusable UI components and client-side routing to standardize the ERP interface and accelerate feature delivery.
- Developed custom ERP modules and forms using the Frappe Framework, integrating RESTful APIs and basic backend logic (data validation, CRUD operations) to keep enterprise data in sync in real time.
- Collaborated closely with design and engineering teams by creating and reviewing high-fidelity Figma prototypes, handling UI bug fixes, minor backend tweaks, and polish work to ensure smooth end-to-end user experiences.

Internship — MangosOrange

Nov 2024 – Feb 2025

Noida

- Built responsive web interfaces from scratch, translating design concepts into functional code using HTML, CSS, and React.js.
- Adopted real-world development practices, including version control and collaborative coding standards, simulating a professional agile environment.

Projects

DealForge – Interactive AI Negotiation Game [\[Live Demo\]](#)

- Integrated **Mistral AI (LLM)** using **prompt engineering** techniques to power realistic, context-aware multi-round seller negotiations, significantly enhancing user engagement and immersion.
- Implemented secure **JWT authentication** and robust **MongoDB schemas** to protect user data and reliably persist negotiation scores.
- Built a real-time **React** chat interface with state-managed game flow and optimized frontend updates to reduce perceived latency and support concurrent sessions.
- Engineered modular **Express middleware** (rate limiting, CORS, error handling) and a global leaderboard with persistent scoring and ranking logic to safeguard AI endpoints and drive user retention.

Snitch – Full-Stack E-Commerce Platform [\[Live Demo\]](#)

- Built a full-stack e-commerce platform using **React**, **Node.js**, **Express**, and **MongoDB**, covering **authentication**, product discovery, **variant management**, **cart**, checkout, and payments.
- Designed role-based access control for buyers and sellers, enabling sellers to list, manage, and update their own products while buyers browse, purchase, and track orders through a shared platform.
- Designed **role-based access** control for buyers and sellers, enabling sellers to list, manage, and update their own products while buyers browse, purchase, and track orders through a shared platform.
- Implemented **variant-level cart handling**, allowing products with different sizes/attributes to maintain separate quantities and prices while validating available stock before cart updates.
- Structured the backend around **controllers**, **services**, **DAOs**, **models** and **middleware**, separating **API handling** from database and payment logic.
- Implemented authentication using **Google OAuth** and **HTTP-only cookies**, with **middleware** protecting user-specific APIs such as cart and checkout.
- Integrated **Razorpay** for order creation and server-side payment **signature verification**, persisting payment and order details in MongoDB.

Education

B.Tech in Computer Science — Dr. A. P. J. Abdul Kalam Technical University

2021 – 2025

CGPA: 7.01

Certifications

- Programming with JavaScript – Coursera
